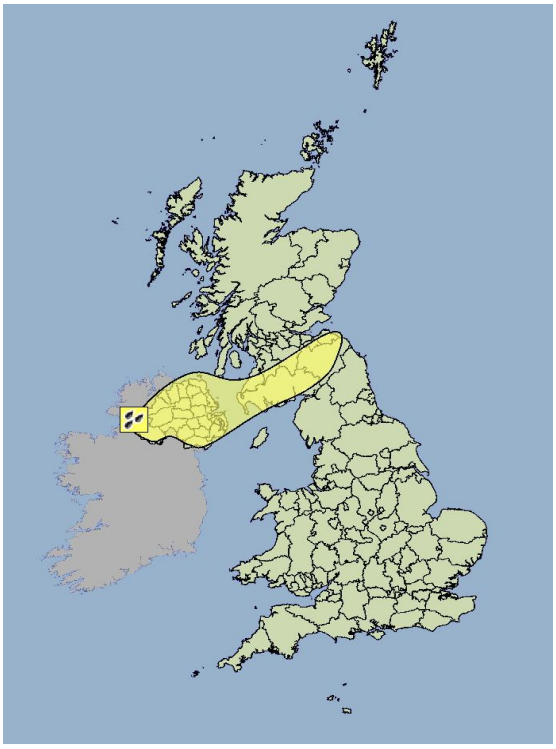
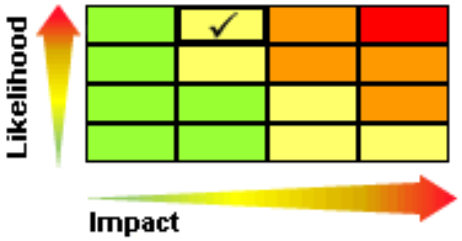
National Severe Weather Warning Service





Chief Forecasters Assessment
30 to 40 mm of rain falling within 6 to 9 hours seems likely to lead to flooding of some sections of road and perhaps also properties.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **16:00 on Tue, 12th Sep 2017** until **06:00 on Wed, 13th Sep 2017**

Heavy rain is expected later on Tuesday and early on Wednesday across parts of Northern Ireland and southern Scotland. This may cause flooding on the transport network, with spray and difficult driving conditions due to the combination of rain and wind. There is also a lower likelihood of flooding affecting homes and businesses.

Note also the possibility of strong winds in parts of this area - please see the separate warning.
